

Frequently Asked Questions for YSASP

1) If I finish this contract will I lose my license?

No. By completing this program's contract, you will avoid the 60-day license suspension and the \$300 fine that would be imposed for failing the YSASP program. This does not apply if you have any other pending charges that may lead to losing your license.

2) Is there a fee? When will I need to have it paid by?

There is a \$175 program fee that is due at enrollment into YSASP. If you are unable to pay the entire fee or if you're needing a waived or reduced fee due to hardship, you must provide proof of income. Copies of last year's taxes, letters from REACH-Up or Social Security, etc. are all acceptable forms. This will need to be determined before taking part in this program.

3) What if I don't live in Windham County or even in Vermont?

You may still participate in the program. Some cases will need to come back to Vermont, but some will/can be done remotely over the internet via FaceTime or Skype. It's determined on a case-by-case basis.

4) What is a drug/alcohol health screening?

Our focus is on the health of our young people. The State of Vermont together with the University of Vermont worked together to develop an evidenced-based screening tool that is effective in helping to give a snapshot of a young person's substance use, and if there are any issues to be examined.

5) Where do I go to get the screening done?

The health screening is now done in our YSASP office. If you have problems using a laptop please let your case manager know. The case manager would be glad to help you with this. If you are participating in the program remotely, we can arrange for the screening to be done electronically.

6) What do I do if referred for a clinical assessment?

A clinical assessment (when recommended) must be completed by a licensed clinician. We have a licensed clinician available to conduct assessments here at Youth Services, or you may use a pre-approved licensed clinician of your choice. You are responsible for all fees associated with the assessment and/or obtaining authorization/pre-authorization from your health insurance. Often it will be covered by insurance.
